Alert Disaster Restoration · Official ADR Proposal

Customer: Jordan Q. Testcase

1428 Synthetic Oak Ln, Bakersfield, CA 93308

10-15-2026

Estimator: Matthew Myers · CSLB #950983

Customer estimate range: $1,513.80–$1,680.60

Itemized charges at base rates: $1,513.80

Findings

Due to property age (1965), California State Law requires third-party lead and asbestos testing prior to destructive demolition.

Photo 3 (Hallway) — Extech MO290: 23% WME

Proposed scope

Testing is required under California State Law due to the home's construction year. A third-party company will conduct lead and asbestos testing to determine their presence. If the results are negative, remediation can proceed as outlined below. However, if lead or asbestos is detected, we will discuss the necessary abatement steps with the homeowner, and a price adjustment will be made accordingly.

Per IICRC and EPA protocols, Alert Disaster Restoration technicians will don appropriate personal protective equipment during mitigation/remediation services. The technicians will set containments as needed.

Kitchen: category 1 finished/drywall/trim demolition

Hallway: category 1 finished/drywall/trim demolition

If technicians encounter additional affected building materials beyond the quantities previously described, the project manager will contact the property owner to discuss any additional course of action necessary and the associated cost.

(this does not include the pretest for lead/asbestos)

NOTE: This estimate does NOT include reconstruction after remediation. Demolition is a highly unpredictable procedure. As such, any collateral damage resulting from the demolition prescribed herein will NOT be the responsibility of Alert Disaster Restoration. This estimate does not include testing of any kind.

If the work proceeds through an insurance claim, we will reprice the estimate according to industry standards using Xactimate.

Estimate is valid for 30 days from date of inspection.
